About This Game

MAGMA CHAMBER

Magma Chamber is a puzzle-based action game about a slime escaping a lab inside of a volcano. Each area of the lab presents new puzzles and different challenges for you to overcome.

Each level has three objectives: Clear each tile, collect the children of slime, and get to the exit. Completing all of the objectives will take strategic thought, as a single wrong move could end your chance to clear each tile or, even worse, could end your life.

Each zone has its own boss fight that will push the limits of your ability, each with their own unique puzzles that you must complete to move on.

Final product features will include

- 3 unique worlds
- Puzzle based boss fights
- Steam achievements

-
- Steam leader boards

A good start for a building sim. I have no qualms paying the current sale price of 6 dollars to support this endeavor. I like the higher detail of textures, so far no slow frame rate issues.

The radio was a nice touch, an option for the volume to gradually fade the further away one is from it might be nice. I like the ability to use shovel and seed to grow crops. Perhaps further down the road using the pipes for irrigation? Other suggestions as the developer seems open are Stars at night? Object import? terrain deformation?

The mechanics for building are intuitive, solid and fun. If you are into the builder niche get it, if not look elsewhere.. Very simple, pleasant aesthetic. No explanation of how to play, but it's easy enough to pick up. Definitely worth a dollar. 8V10.

Seasteader: where you can make a town in the open ocean on wooden planks, just like I know we all want to do. The game is easy to pick up in terms of how to build but takes a deep dive with its market economy. The biggest drawback, by far, is the price tag. Seasteader has yet to show that it is a \$30 game. There aren't a lot of individual assets that I noticed. Around 35-40 unique buildings and the task to manage people, wages, rent, and a market economy. Yet the game lacks the polish for their asking price. Don't get me wrong it IS a fun, casual, city-builder; I don't know if it is a \$30 city-builder though.

Pros:

- + Easy to learn building controls
- + Unique city-builder concept
- + Good soundtrack
- + Excellent Dev response time with patches

Cons:

- Game price is too high
- Market economy makes me feel dumb

Check out my in-game review:

<https://www.youtube.com/watch?v=Lt3nbHBCLxc>. [Do these to Commandos 2:](#)

[Downgrade the UI.](#)

[Lock difficulty on hard.](#)

[Implement crappy controls.](#)

[Less missions.](#)

[and you get Commandos 3. Come for the little sisters](#)

[Stay for the infinite achievements. An interesting look into EG and Starcraft 2.. i hoped more out of the game. While not expensive a lot of free clickers are better then this game.](#)

[Upgrades are to linear and simple and the worst part is you need the game in focus.](#)

[Futhermore the game has some bugs but those can be solved over the time.](#)

[i cannot recommend it. I think the paint job on the loco is great also this SD40-2 to me drives better all around then the others and the sound of the loco is very good I love this one.. redmption](#)

I watched the videos, liked the idea. I paid for the game.

At first I got angry because of the bugs, now I became silenced by developer's activity.

Pros:

- Developer is active and doing his job. EDIT3: This is a real positive
- Game has a nice design, music, etc.
- Has potential.

Cons:

- Unreliable AI, especially path-finding and movement. They get stuck in every possible corner.
- Bugs. Big, fat bugs.

EDIT3: I cleared everything (problem list) after pros and cons. Game's really made progress! I now recommend it, give it a try, but don't expect perfection!. I love this game and I love you guys for making this game. The choices made me laugh out loud (I apparently picked 'diplomatic hellion' choices, which really match me) and the romance option I chose (epic wlw route btw, it's so hard to find) had the most satisfying ending imaginable. This is exactly the game I was trawling steam visual novels for. I just regret I waited to buy it till now tbh. If you're WLW and looking for a sweet visual novel romance game play this or Arcana on mobile from Nix Hydra.

Apart from the characters/story/writing and choices, which I adored, the atmosphere was really created for you with adequate but not annoying music/sound effects and the backgrounds weren't lavish, but provided a good backdrop to the entertaining scenes nonetheless. Really, the level of fun I had and the actual laughter this game prompted out of me probably annoyed other people in my house. Buy this game boss it's worth it. sometimes i even impress myself

tooo late :c. American Football Sims? Hard to come by! They are like the White Buffalo...

So I decided to try FOF 7. In summary its worth the price of admission because nothing else exists. Front Page Football is horrible so that leaves Front Office Football.

Is it fun? Yes! if you like American football and you pour over every detail online every Sunday Evening for the Stats for your favorite team. It has its football moments that make you soooooo happy. Taking my hapless St. Louis Rams from 5-11 to 8-8 to 11-5 was quite satisfying. Then in the 2016 draft, Trading a 2016 second round pick, a 2017 first round pick, and a 2018 first round pick for a quarter backed named Felix Brown from Idaho was awesome. Because I interviewed him and decided he was "under rated". He turned out to be a 91/100 overall. The St. Louis Rams are horrible in real life, but in my simulation I have a young Tom Brady or Aaron Rodgers to destroy the league with! HAHHAHAHAHA!. Frontlines: Fuel Of War fast game with modern day graphics with easy controls that moves from location A to B to C and so on, good amount of action and special effects, provoking the audience with a good amount of modern day issues with a good amount of valid arguments that raises conscious awareness

good game.

Personal Suggested Purchase Price: \$4.99 Or Less During Sale. A short but sweet campaign expansion. The story fills in a few gaps in the existing campaign and teases of the direction that a larger expansion or a sequel will go in. The new missions don't seem as difficult as the main campaign, but do play with some different mechanics that the main campaign didn't use much of, if at all.

As a free update for anyone who currently owns the game this pack is awesome, how well priced it will be for new players has yet to be seen. The new campaign should take most players no more than two hours to complete.. Fun little board game.

If they didn't have to option to speed up your game, this would be incredibly boring.

this game will crush you if you don't play to your characters strong points and weaknesses.

I was lucky enough to get for \$1 during golden week, but even if I didn't get it on sale I'm sure it still would have been worth the

money. It's a bit expensive, but it's already saved me hours of time, so I can't complain. If you don't want bells and jingles all over the place for insane adrenaline then this is the game for you, unless ur playing Timed, in which gl trying to beat Rubycoredbejeweled's score. I'd love to see a bunch more helos added, RAH-66 Comanche, AH64 Apache, OH-58 Kiowa, Mi-28 Havoc, Denel Rooivalk and Eurocopter Tiger
